

Edge-based video for vehicles

With Observit, your cameras will work harder and smarter—meaning you have no need of in-vehicle recorders. You have lower costs and become more sustainable. Observit makes it easy to interact with multiple devices at once.

Our unique solution:

- Your cameras become edge computers, connected over-the-air
- Absolutely no need for on-board network video recorders (NVRs)
- Artificial intelligence ‘recognises’ images in deep-learning environments
- Hassle-free management through our online portal, or via API to your system
- Instantly scalable, with multiple apps available, automation & intelligence

Your busy depots

MOVING PEOPLE

Our intelligent automation & remote-access technology make busy depot management achievable, proactively changing risk environments.

- **Vehicle Positioning System**
- **Damage Investigation**
- **People Counting & Occupancy Analysis**

MOVING CARGO

Clear, reliable and accessible Observit video is simple to use and incredibly powerful to have. It is instantly scalable, flexible & adaptable.

- **Scheduling, pickups & customer communications**
- **Sensor reporting, data capture & big-data analysis**
- **Compliance reporting that drives up standards**
