

# Edge-based video for emergency vehicles

Our unique approach to video in vehicles means that you have less hardware, lower costs, greater reliability and flexibility in a truly scalable solution. Perfect for emergency response vehicles, while better protecting your officers.

## Benefits:

- No recorder needed—in-vehicle video access
- Over-the-air access to video—live and recorded
- Over-the-air mass management of devices for cybersecurity

## How does it work?

**No server or recorder in the vehicle**

*Watch live-streaming or recorded video over-the-air*

**GPS and telematics**

*Cross-reference GPS and telematics data with video*

**Easy to install, simple to use**

*Review video and start recordings in-vehicle with Android application*
